Professional Summary

Frontend Developer with 3+ years of experience building responsive, high-performance web applications using React, TypeScript, and Tailwind CSS. Strong passion for clean UI design, performance optimization, and real-time data interfaces, especially in sports and analytics. Team-oriented, self-motivated, and eager to continuously learn and improve.

Education

Bachelor Of Science – Electronic And Electrical Engineering

2020 - Present

Skills

- **Languages:** HTML, CSS, JavaScript, TypeScript, Python, Golang.
- **Frameworks & Libraries:** React, NextJs, Node.js, Express.js, TanStack Query, Tailwind CSS.
- **Tools & Platforms:** Git, GitHub, Vite, Vercel, Postman, React Testing Library, Firebase.
- **Soft Skills**: Team collaboration, problem-solving, passion for data visualization.

Work Experience

HNG Tech — *Frontend Developer Intern*

September 2023 – October 2023

- Collaborated with designers and backend developers to build web applications.
- Gained practical experience in UI implementation and team-based development workflows.

Projects

Parascores

- A real-time football web application delivering live scores, match statistics, player ratings, and team lineups across global leagues and competitions.
- Built with React, TypeScript, TanStack Query and Tailwind CSS, this project showcases my ability to implement dynamic UIs, handle real-time API data, and design responsive interfaces for high-traffic, performance-sensitive environments.

Lineup Builder

- An interactive tool that lets users create and customize football lineups by selecting formations, assigning players to positions, and saving or sharing setups.
- This project demonstrates my skills in component-based UI architecture, drag-and-drop interactivity, and state management to deliver a smooth and intuitive user experience.

Player Comparison App

- A modern web app that enables users to compare football players using advanced metrics like goals, assists, passes, and tackles across different seasons and leagues.

- Built with React, TypeScript, TanStack Query and Tailwind CSS, it highlights my ability to work with data, implement responsive layouts, and present complex information in a clear, user-friendly way.

DreyXinx

- A full-stack storytelling platform where users can read, write, and share stories, with interactive features like commenting, liking, and bookmarking.
- This project emphasizes my frontend strengths in form handling, authentication UIs, and building clean, accessible layouts that scale well across devices.

Hobbies & Interests

Avid football fan with a keen interest in sports analytics, data visualization, and building football-related tech projects.
